Keyboards for vending machines

The easiest solution for repair and replacement

To support you in the maintenance of keyboards, we present three different solutions for you to choose from.

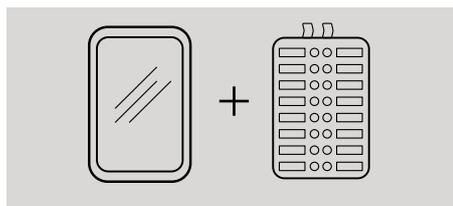

This aims to reduce the replacement cost by a third and minimize the waste of plastic components, with components 100% made in Italy.

Here are all the combinations available:

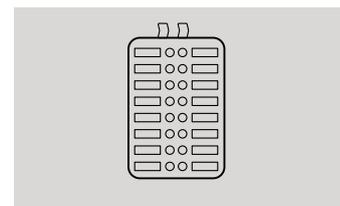

COMPLETE VERSION

Complete with plastic support, membrane push-button panel and electronic board

NO-BOARD VERSION

With plastic support and membrane push-button panel, without electronic board.

MEMBRANE-ONLY

Membrane-only version, without plastic support and electronic board.

But there's more!

We customized the membrane keyboards to provide with the brand-new FLATIN models.

What are FLATIN models?

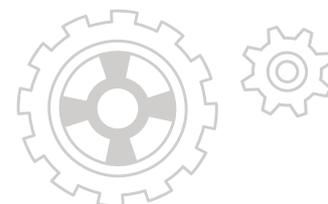

Older models of the machines need the membrane with the flats INVERTED respect to the more recent machines.

With this solution you will be able to replace the membrane regardless of the machine model, without having to purchase the complete version of the keyboard.

Not sure which model is suitable for your machines?

Contact our technical support! We will be happy to help you.

ADHESIVE MEMBRANES: instructions for gluing and connector insertion

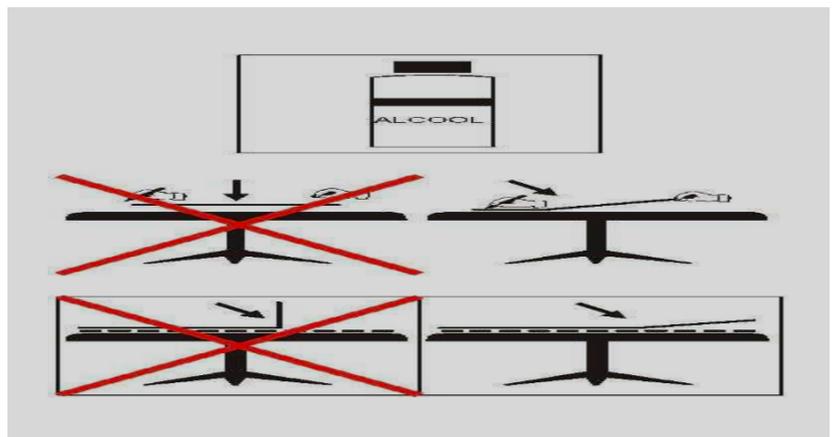

The membrane must be glued to the support in accordance with the following instructions:

Positioning and gluing (after thorough cleaning of the gluing surface)

This operation must be carried out progressively so as to avoid the formation of air bubbles between the membrane and the support, taking care not to bend the keyboard too sharply along the gluing line.

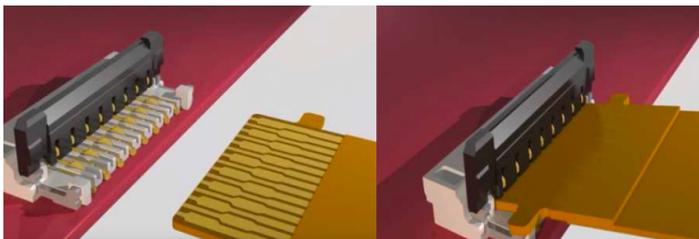

It is recommended to apply the glue at a room temperature above 12 degrees;

Adhesion to the support will occur no sooner than 12 hours.

Connector Insertion Instructions

The insertion of the connector to the ZIF must be carried out in accordance with the following recommendations:

It is recommended to insert the flat cable in the correct pin direction.

It is recommended to insert the flat cable to the zif connector avoiding bends/curves to safeguard good functionality.
